A PhD position is available at the Laboratory for Innate Cellular Immunology, Department of Internal Medicine I, University of Bonn Medical School, Germany.

Our group (http://www.bonn-innere1.de/ag-nattermann.html) performs translational immunological research studying compartment-specific characteristics of human innate lymphoid cells (ILCs). The current project relates to the regulation of functional heterogeneity and plasticity of human tissue-bound ILC3.

The position starts January 2020 and is for a period of 3 years, with the possibility of an extension.

The ideal candidate will be a highly motivated, team-oriented graduate with a strong interest in cellular immunology and microbiome studies. Experience with flow cytometry, cell culture, and/or molecular biology techniques is advantageous. Candidates should hold a diploma or a master’s degree in biology, molecular biology, biomedicine, or a related subject.

We offer supportive mentoring and a well-equipped laboratory. Successful candidates will be awarded a PhD.

The position will be a 65% full time equivalent. Salary will be according to the German salary scale TV-L E13. The University of Bonn is an equal opportunities employer.

Questions concerning the project can be addressed to Prof. Jacob Nattermann. Interested candidates should apply via email with a letter of motivation, CV, certificates, and recommendation letters. Please send your application as a single PDF.
